

Clifford All Saints AFTER SCHOOL CLUBS

THIS HALF-TERM: SCRATCH 3.0

ComputerXplorers provide technology-based after-school clubs that are fun and educational. We encourage children to find out what's happening behind the technology, building in collaboration, creativity, critical thinking and confidence along the way. We offer a huge range of technology-based computing and STEM (Science, Technology, Engineering and Mathematics) classes including programming, digital storytelling, web design, coding, robotics, 3D and 2D animation, forensic science, video game design, music technology - the list is endless!

Our after-school club is the perfect way of building programming into the Computing Curriculum for children to sharpen their skills, develop a passion for technology and will prepare them for the future.
