

PROJECT UPDATE

Welcome to our first update on the fantastic building work that is taking place on our Ringinglow Road site. We are amalgamating our two sites and saying goodbye to Psalter Lane in September. There will be lots to share over the coming months. If you haven't chosen your preference for school timings yet, please go to school spider and vote before the end of the Easter holidays.

News from our Reporters

In each building update, our roving reporters will share news and information about the building project. This time it's Y6s turn!

The fencing has gone up around the Spooner block and around the obstacle course. The fencing was put up in the 21st March.

The builders have started work and have brought a scaffolding van in to start putting it up. During the week, they have been emptying the building and have put all of the old things into the skip.

Charlotte

Part of our playground has been out of use recently because the builders are doing lots of work to the new infant site because they are moving up to the junior site. The builders have been really busy and are going to be taking the roof off so they can make it better for our KS1 children. I am excited to watch this happen!

Ava

Last week, the builders came and put up fencing to stop anyone from entering the building site. On Tuesday, a skip arrived to put old bits of equipment in. For the rest of the week, the builders emptied the building. On Monday, a lorry which had scaffolding in it was driven into the playground. The fencing was widened to surround the lorry.

Harriet

It has been exciting to see all of the workers come in to look at the roof and all of the other stuff they are going to do and seeing all of the equipment has been cool to see!

Raumaan

At Clifford All Saints our Champions of Change are working hard behind the scenes. The next update we share will be from our Active Travel Team!

Interview with our Office Manager Mrs Dobbins

What is your view on the construction work so far?

It's exciting but noisy! I'm happy to see it starting to take place and making sure it's all safe.

How do you feel the construction work will change our school?

It was quite an awful building so I think the changes will be great! It will be good for learning and good for parents and that siblings will be together on one site.

How has the building work affected your work in the office?

There have been lots of things to organise! Mr Newall has been working hard to make sure everyone is safe. It can be a bit noisy when I'm on the telephone!
